

Overview

The new Secabo TCC clam press is an automatically opening clamshell press specifically made for baseball caps, hat etc. It is not necessary to wait, while the transfer is pressed. After the desired timer has finished, the heat press opens automatically and announces this with an acoustic signal. With a large digital controller, temperature and pressing time can be adjusted. A counter counts the number of transfers that have already been made during the current session.

The counter can be reset to zero at any time. The pressure can be adjusted with a wheel on the bottom of the base plate. The TCC is a professional cap press suitable for all common transfer methods like flex, flock, sublimation, inkjet-flex or chroma blast.

features

digital controller

Time and temperature are set within one digital controller.

Variable working pressure

the pressure can easily be adjusted - depending on the technology and object

Working Safely

The safety and quality of the machines is permanently controlled by German safety standards

Exact temperature distribution

The high-quality heat plate ensures an exact temperature distribution over the whole heating plate

Exchangeable base plates

Exchangeable base plates available - in different formats.

Low hysteresis

The temperature controllers reduce temperature fluctuations to a minimum

technical data

net weight	15 kg
dimensions	24cm x 64cm x 53cm
environment	+5°C - +35°C / 30% - 70% humidity
power supply	AC 230V / 50Hz - 60Hz, 1.0kW
maximum time preset	999 s
max temperature	225 °C
scope of delivery	heat press, power cord, english manual
max. clam angle	35 °
working area	15cm x 8cm
