Product Data Sheet

SUNCOAT CONCENTRATED STENCIL STRIPPER

Product code: YC28/YC285

Pack size: 1 Litre/5 Litre

Suncoat Concentrated Stencil Stripper has been formulated for the de-coating of direct stencils, either by manual cleaning or especially in automatic reclaiming machines.

TECHNICAL DATA AND WORKING ADVICE

Suncoat Concentrated Stencil Stripper should be diluted with 20 to 30 parts of clean water. Mix in plastic containers. Do not store in metal containers.

After removal of ink residue from screen with an emulsifiable screenwash, rinse the screen with water. Apply diluted strip liquid to both sides of the screen and leave standing for a few minutes. The stencil may now be removed by hosing off with water. A high pressure water jet will assist in obtaining a quick and thorough clean. In automatic reclaiming machines diluted strip liquid is automatically sprayed onto the screen and a dwell time of 23 minutes should be programmed before high pressure wash off is commenced.

Note: Do not apply product at full concentration or let it dry before removing with water as the stencil will harden and become difficult to remove.

HEALTH & SAFETY

Suncoat Concentrated Stencil Stripper contains a low level of an acid to prevent the blocking of spray jets in automatic reclaiming machines and should be treated as an irritant. Skin and eye contact should be avoided. Detailed Health and Safety Data is available on request from your local Sun Chemical Screen branch.

This information has been carefully compiled from experience gained in the laboratory and under commercial conditions. However, the product's performance and its suitability for the customer's purpose depend on the particular conditions of use and the material being printed. We recommend that customers satisfy themselves that each product meets their requirements in all respects before commencing a print run. Since we cannot anticipate or control the conditions under which our products are used it is not possible to guarantee their performance. All sales are subject to our standard terms and conditions of sale.

We would point out that the information contained in this leaflet is only a recommendation and may need to be altered to suit the conditions and efficiency of the equipment employed. Sun Chemical Screen products are not designed for use in conjunction with those of any other ink maker or similar supplier unless agreed in writing.
